IN THE UNITED STATES PATENT AND

TRADEMARK OFFICE

In re application of: Henderson et al. Group: 2186

Serial No.: 10/622,311 Examiner: Tuan Thai

For: CACHING ASSOCIATIVE MEMORY USING NON-OVERLAPPING DATA.

1. This office action is responsive to communication filed on 12/08/04. Claims 1-49 are now allowed.

REASONS FOR ALLOWANCE

2. The following is an Examiner's Statement of Reasons for Allowance:

The prior arts of record do not teach nor suggest, either alone or in combination, all the limitations of the claimed invention (claims 1, 14, 30 and 42), particularly a system, method and article of manufacture comprises a machine readable medium (wherein the machine readable medium is defined as magnetic media such as floppy disk, magnetic tape, CD-ROM disk and flash memory device; specification's page 10) for caching data in an associative memory cache using a single non-overlapping entry comprises searching an associative memory cache using a search key, and in response to a miss at the associative memory cache, accessing a primary associative memory; identifying

in the primary associative memory an entry matching the search key and a number of overlapping entries. The prior arts of record do not specifically disclose creating a non-overlapping entry wherein the non-overlapping entry having a range that includes at least a portion of a range of the matching entry and that does not include ranges of the overlapping entries. In light of the foregoing; claims 1, 14, 30 and 42 of the present invention are found to be patentable over the prior art.

Claims 2-13, 15-29, 31-41 and 43-49 further limit the allowable independent claims 1, 14, 30 and 42. These claims are therefore allowable for the same reason as set forth above.

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
